

Internship

Policy Analysis

Are you looking for an internship for at least 10 weeks? We are giving you the chance to put your theoretical knowledge into practice.

1 Description

You will contribute to the definition of Coreso strategy and work on practical topics which overcome strategic challenges of Coreso SA.

As an intern in Coreso's Management Team, you will be part of the development of internal/external corporate communication. You will also directly contribute to the promotion of Coreso's missions at European level by advocating for its interests.

The intern will also enjoy an international experience while developing professional skills with concrete tasks. This internship will allow the student to bring their classroom knowledge into a professional work setting and broaden their knowledge through hands-on application in a professional environment.

Your tasks will include:

- Monitoring of legislative and regulatory changes at the European level.
- Preparation of internal interpretations in accordance with such changes.
- Follow-up of the ongoing negotiations on topics with connections to Coreso main missions.
- Support the management team with analyses and decision proposals on strategic topics.
- Contribution to the definition of internal communication strategy.
- Dissemination of knowledge within the company.
- Coordination of meetings , seminars and visits at the Coreso headquarters.
- Cooperation with Coreso shareholders Public Affairs Departments.

This internship will give you a solid knowledge of European electricity market.

Send your CV and application form to contact@coreso.eu.

2 Prerequisites

The ideal candidate is a student at master's degree level (Engineering, Business School, European Law, European Affairs, Political sciences). We are looking for somebody detail oriented, organized and creative and who possesses a professional work ethic and is enthusiastic to gain new knowledge.

Skills and competences:

- University degree (Engineering, Business School, European Law, European Affairs, Political sciences)
- High degree of initiative, assertiveness, self-organization as well as communication and team competences
- Fluent in English and in French or Dutch – other language skills (e.g. German, Spanish, Italian) welcome
- Self-motivated, detail-oriented with strong written, verbal & organizational skills
- The ability to work independently and with others

3 Conditions

The intern will enjoy an international experience while developing professional skills with concrete tasks.

This internship will allow the student to bring their classroom knowledge into a professional work setting and broaden their knowledge through hands-on application in a non-profit environment.

- Reimbursement of travel costs or rental charges if you come from abroad.
- Hands-on experience to build portfolio and professional contacts.
- School credit, depending on the requirements.

4 About Coreso

The mission of Coreso is to proactively support Transmission System Operators to ensure Security of Electricity Supply in Europe. Located in Brussels, about fifty engineers, seconded from their companies, combine their expertise 24 hours a day, 7 days a week to anticipate the operation both in the short term and the long term, from a year ahead until Intraday (few hours before real time)

Founded in 2008, Coreso encompasses nine European operators, which are also its shareholders (Elia in Belgium, Eirgrid in Ireland, 50hertz in Germany, National Grid in the UK, REE in Spain, REN in Portugal, RTE in France, SONI in Northern Ireland, Terna in Italy).

Within the European context of progressing market mechanisms, continuous growth of renewable energy, ambitious grid development and further harmonization, new coordination challenges are numerous. Coreso aims to build up, together with all partners, the adequate coordinated operational processes to cope with these game changers. To secure operation of the European electricity system represents a truly international challenge.
